

Supply Planning, Made Simple.

SCmple optimizes and automates the supply chain planning process for clinical and commercial pharmaceutical companies, ensuring that essential, life-saving medications are delivered with unparalleled precision and reliability to patients.

Robust Data Integration

Connect to any ERP system or external data source with an API

Extensive Configuration

Tailored for the nuances of the pharmaceutical supply chain

Fast Implementation

Implement within weeks and at minimal cost

Features

SCmple streamlines both emerging and growing supply chains by enabling supply planning based on best practices, coupled with advanced analytics and real-time data visualization. SCmple serves as a rapid digital transformation tool that reduces guesswork, strategically plans for critical materials and products, and facilitates data-driven decision-making.
