

## Embrace the unknown with confidence.

SCmple Foresight is a comprehensive scenario planning solution with unparalleled capabilities for enhanced risk management and improved decision-making. Through real-time analysis and advanced functionalities, planners can simulate diverse scenarios and proactively adjust the supply plan to mitigate potential challenges and improve operational efficiency.

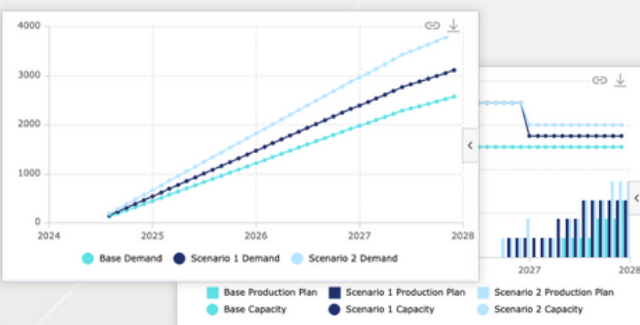

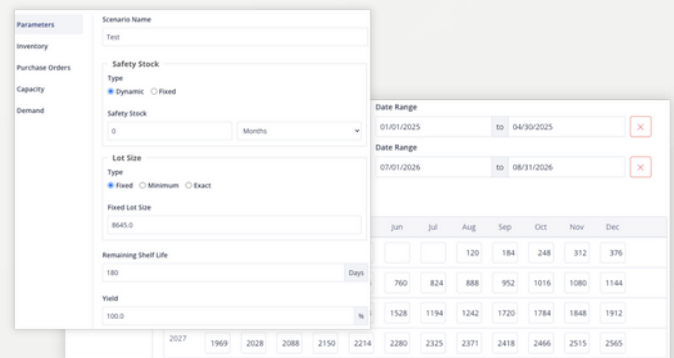

## Designed for ultimate flexibility and peak agility.

- ✓ Master data synchronization
- ✓ Real-time impact analysis
- ✓ Rich & actionable alerts

## Unlimited configurability

SCmple Foresight eliminates the uncertainty in planning for unforeseen challenges. It enables users to effortlessly adjust any input to generate highly tailored scenarios for optimal risk management and logistical readiness.

## Advanced scenario comparisons

Evaluating multiple scenarios has never been easier. Select any data field and compare multiple scenarios with your current plan to visualize potential supply chain planning implications for a more informed strategic decision-making process.
